

INDEPENDENT ENGINEERING & CYBERSECURITY

Kernel Panic

I take technology apart.

I'm a software engineer who enjoys figuring out how things work. I share what I learn because I think technology is more interesting when everyone can understand it.

PARTNER WITH KERNEL PANIC

Put your technology to work.

Original demonstrations, practical explanations, and technical stories built around what your product can do.

01 **Sponsored Technical Reels**

Original short-form demonstrations that put relevant products and technologies in a real technical context.

02 **Hardware Reviews & Demonstrations**

Hands-on engineering content featuring security hardware, electronics, and developer equipment.

03 **Developer Tool Integrations**

Authentic demonstrations showing how a tool fits into a practical engineering workflow.

04 **UGC Content Production**

Original technical videos your brand can license for its own marketing channels.

05 **Educational Collaborations**

Tutorials, engineering workshops, and educational campaigns that make complex technology understandable.

Content focus: Reverse Engineering / Cybersecurity / Privacy / Python / AI & Automation / Hardware
